DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 2-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 2 is incomplete and thus the claim is indefinite. Claims 3-7 also are rejected in that they are dependent on the indefinite claim and thus inherit the deficiency above.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Date.

Date discloses an optical scanning device comprising: a polygon mirror (1), a base board (bottom of optical box 50), and mounting means (42) for mounting the polygon mirror thereon through the base board. The mounting means has a bottom peripheral surface portion directly fixed on the base board and thus prevents a current of air generated due to rotation of the polygon mirror from penetrating into below the base board. See Fig. 3A.

Allowable Subject Matter

Claims 2-7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 8-13 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the applied prior art fails to teach or suggest the claimed invention having the structure defined in each of the indicated allowable claims.
